# 3 Phase High Output Double Barrel Floor Model Machine with Air Pumps

- The Ice Cream Dream Machine BL-260 is an independent dual system advanced soft serve machine, newly developed by our company. Compared to traditional ice cream machines it has the advantages of using two compressors, dual independent refrigerating systems and dual mixing systems thus can be operated one system at any time
- The Ice Cream Dream Machine BL-260 has 2 high flow soft serve flavor levers and a center lever for a 2 flavor mixing option.
- The storage tank has a pre-cooling function to keep the temperature of the milk ice cream mixture from 2°C to 8°C. The left over milk ice cream mixture in the tanks are kept fresh for the next business day
- The Ice Cream Dream Machine BL-260 has a special mixing function with air pump that doubles the expansion rate of the ice cream milk mixture compared to conventional soft serve machines
- Air cooled condenser adopts high quality motor and fan producing high air volume and low noise
- The ice cream mixture system is manufactured with stainless steel, non-toxic engineering plastics and non-toxic silicon rubber conforming to hygienic standards
- The advanced and reliable computer-controlled digital circuit and touchscreen that has compressor over-load protection, phase-lost circuit, low voltage protection and temperature auto control device with easy operation and high automation
- The Ice Cream Dream Machine BL-260 has an electric numerical control module that allows you to automatically control and adjust the hardness of the ice cream

## Technical Specifications

	Output	1/h	30*2
Compressor	Model		300FSV2-F
	Qty.	Piece	2
	Voltage/Power rate	V/KW	380/2.2
Mixing motor	Model		YE3-90S-6
	Qty.	Piece	2
	Voltage/Power rate	V/KW	380/1.0
Storage tank	Qty.	Piece	2
	Volume	Litre	11
	Pre-cool		•
	Automatic alarm for shortage of milk mixture		•
	Milk mixture mixing function		•
	Air pump		•
Evaporator cylinder	Qty.	Piece	2
	Volume	Litre	2.4
Condenser	Cooling type		Air-cooled
	Fan model		YSWF74L47P4
	Voltage/Power rate		380/0.2
Refrigerant	Name		507
	Injection dose	Kg	0.7*2
Complete machine	Power supply		380V/50HZ 3N ~
	Power rate	KW	6.6
	Dimensions	Metre	~ 0.95 x 0.7 x 1.65
	Net weight	Kg	380
